## DETAILED ACTION

### *Priority*

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Germany on August 28, 1999. It is noted, however, that applicant has not filed a certified copy of the German application as required by 35 U.S.C. 119(b).

### *Drawings*

2. New corrected drawings are required in this application because for example figure 1, the lines appear to be hand drawn. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### Specification

3. The abstract of the disclosure is objected to because it exceeds 25 lines of text and is over 150 words. Correction is required. See MPEP § 608.01(b).

### *Allowable Subject Matter*

4. Claims 17-32 are allowed over the prior art of record.
5. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 2877

The Examiner's most pertinent art found was U.S. Patent 6,278,517, that discloses a device for visually inspecting the surface condition of a large-dimension surfaces, which is similar to the claimed invention but fails to disclose or make obvious the limitations listed below.

Regarding claim 17, the prior art fails to disclose or make obvious a system illuminating device irradiates a surface to be inspected at flat angles having the angle between the normal line of an inspected surface element on the surface and the connecting line between the inspected surface element and a point on one of the elongated luminous surfaces is greater than approximately 60 degrees. The prior art further failed to disclose the light distribution of the respective elongated luminous surfaces is tightly concentrated in planes, which lie transversely with respect to the longitudinal direction of the respective surface, with an aperture angle, which is smaller than 15 degrees, and in combination with the other recited limitations of claim 17. Claims 18-32 are allowed by the virtue of dependency on the allowed claim 17.

### ***Conclusion***

6. This application is in condition for allowance except for the following formal matters:

The abstract, drawings, and priority papers indicated in the paragraphs above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
